🕒 Introduction & Motivation

🌙 HU

I have worked at IT area since early 2000. Initially I dealt with software development as freelancer, later I realized, I could use better my acquired knowledge as leader. I have found really myself in this role, because as IT leader I still have to solve problems and build systems at innovative areas. The different is that now I not only develop applications, but also build team. At 2015 I developed a boardgame (Startupper) for to-be leaders and managers, so I could familiarize the profession with interested people in playful.

I believe in the continuous learning (KaiZen), therefore I not only teach myself, I try to inspire and coaching others to the continuous learning. I like the challenges, because I can get the most from myself, I could be free creative and I feel I'm very effective and helpful.

👉 I'm good in ...

- ✓ Communication
- ✓ Understand the goals and needs (5W)
- ✓ Focusing and fulfil the strategy
- ✓ Solve problems creatively
- ✓ Undertake conflicts for evolution
- ✓ Design and implement processes
- ✓ Introduce agile (Scrum, Kanban) methodologies
- ✓ Automate the workflows, make them transparency
- ✓ Find the right position/roles for the colleagues
